Mr. Anthony Batchelor
Svenstrupvænget 3
5269 Odense S

Dear Tony:

ARSag0701: In your e-mail of March 28 2007 you request AR's comments on and approval of a mating between DK *Snugglebugs Francine* (FD RX 144428) and *Moorteich's Gerd* (FD RX 142794). As there in Felis Danica are no specific rules concerning matings between parent and progeny, AR can approve this experimental mating.

ARSag0702: In the same e-mail you inform us about your newly imported GRX-cat, *Jerry Lee Rex von den Katzentreppen* (not yet registered by Felis Danica). You have attached a copy of the cat's original pedigree (SCC-RIEX 06-17368) as well as copies of additional information on its background. As far as I can see, there should be no problem in having the cat registered in Felis Danica's register – unless the *Swiss Cat Club's* register is one of those Felis Danica does not recognize. However, as there is no official list of non-recognized registers, I sincerely hope that you can obtain an FD RX-pedigree shortly after applying.

Best regards,
on behalf of Avlsrådet

Susanna Toldi Bugge
