Why DIBAL?

Range of products

Dibal counts with a complete range of solutions for the weighing and labelling needs of small and medium shops, big surfaces and the industry in general.

Computer Communication

More than 15 year-experience in weighing with computer connection, being the first Spanish company that obtained the approval for PC communicated scales. Our own windows management software for weighing and labelling systems and its integration in the computer systems of all the different shops.

Technology

Dibal R+D department is sized over 30 people and counts with laboratories for verification and electromagnetic compatibility tests (carried out in our own anechoic chamber). Our company is part of the Novatron Group, specialist in electronic engineering and communications.

Quality

At Dibal, we use the best quality components, in order to guarantee the maximum liability of the systems and accuracy of the information. Dibal Quality System was certified by AENOR (an IQNet member) in 1996, being the first Spanish scale manufacturer certified under ISO 9001 standard.

Guarantee for the future

Close to 60% of top supermarket chains in Spain use Dibal scales. In the international field, Dibal is present in more than 30 countries, counting with a highly skilled commercial and technical network. Dibal also has sister companies in Italy and Poland.
